

Deliverable 2.1

Contact lists stakeholders Innovation Platform

Author: Ms Anne Van Snick

Project co-funded by the European Commission within the Seventh Framework Programme

Grant agreement	317898
Project Acronym	Smart@Fire
Project Title	Integrated ICT Solutions for Smart Personal Protective Equipment for Fire Fighters and First Responders
Type of funding scheme	FP7-ICT Combination of Collaborative Project and Coordination and Support Action
Project website	http:// www.smartatfire.eu
Start Date of project	November 15 th , 2012
Duration	39 months
Document due date deliverable	April 15th, 2013
Dissemination level	All partners
Nature	Report
Version	Version 1.0
Work package	WP 2: Innovation Platform
Author	IWT – Anne Van Snick
Contributors	The following partners: IBZ, GMFR, IFV (formal LFR), SDIS 13, Innova, FDDO, Euratex, Centexbel, Ugent, IWT
Reviewer	Christophe Veys, IWT, Carla Hertleer, UGent
Keywords	Innovation platform, market consultation

PCP	Pre Commercial Procurement

Executive summary

Within the methodology of pre-commercial procurement both the market demand and supply side meet and exchange information on the innovation potential of the project, the development of a smart fire fighter suit with integrated ICT features.

Procurers and Fire & Rescue Services have indicated their demand and needs by means of a European inquiry and needs assessments in France, Belgium and the UK. During the market consultation sessions, the suppliers and knowledge centres will interact with procurers, exchange information, discuss upon the innovation potential of the project, and have the opportunity to make consortia to produce prototypes. Having as many stakeholders as possible attending the market consultation sessions is of utmost importance for the success of the PCP process. All partners produced a list with relevant stakeholders in the field of ICT (sensors, localization systems, visualization systems & remote connectivity), smart textiles, PPE, integration of ICT into PPE,...).

A mailing will be sent to all stakeholders, containing information on the project, referring to the website and inviting them to the market consultation sessions. Subscribing to the sessions will be done online at www.smartatfire.eu.
