DEEP is a 4-year European research project (FP7) coordinated by Consorzio per Valutazioni Biologiche e Farmacologiche, with the scientific leadership of Prof. Adriana Caci. The project comprises 32 participating centres in European (Austria, Cyprus, Greece, Italy, Turkey, United Kingdom) and non-European countries (Egypt, Lebanon, Morocco, Qatar, Tunisia), scientific partners from several European countries and a pharmaceutical group based in Canada and in Europe. The Project has the specific aim to produce a new oral liquid formulation of deferiprone suitable for paediatric use and to integrate the existing information on deferiprone use in iron overloaded paediatric patients.
