New Mobile Device Interface for Android 4

- Monitors user's trip while en-route and provides: reminders, alerting messages upon disruptions and suggestions for «emergency» alternatives
- Attractive, coherent and easily readable interface for trip planning and trip redesign

Enhanced WISETRIP improves planning, booking and travel assistance

International Multi Modal Trip Planning and On Trip Assistance: A Challenging Task

- wider synergy among trip planning systems worldwide
- integrating various types of trip-centric information: static, planned and real-time
- fitting information delivery to the traveller needs

What is WISETRIP

A Unified Journey Planner System that features:

- synthesis of responses sourced by participating Journey Planners
- easy and flexible interface
- personalized trip services
 - personal data and traveling criteria
 - store selected trip personalized notification messages / alerts
 - trip redesign

The screenshot shows the WISETRIP website interface. At the top, there's a navigation bar with 'new search', 'my trips', and 'f.a.q.' links. A 'Choose Language' dropdown is set to 'English'. There are links for 'Login', 'New? Create an account', and 'Forgot your password?'. A 'FREE' badge is visible. The main search area is titled 'Find your trip' and includes fields for 'Origin' (United Kingdom), 'Destination' (Greece), and a date/time selector. A 'Yes, Search' button is at the bottom. A sidebar on the left contains a 'What is WiseTrip?' section with a 3D character, 'Find your trip', 'Save your profile', and 'Get real time notifications & reschedules' buttons. A 'Watch the video' button is also present.

Enhancing WISETRIP

Inclusion of a wide grid of criteria

- CO₂ footprint, Elderly and Disabled, Business and Tourist travellers preferences
- Considering trip strategies for different user groups' needs

Advanced real time alerting services sourced from variant data providers

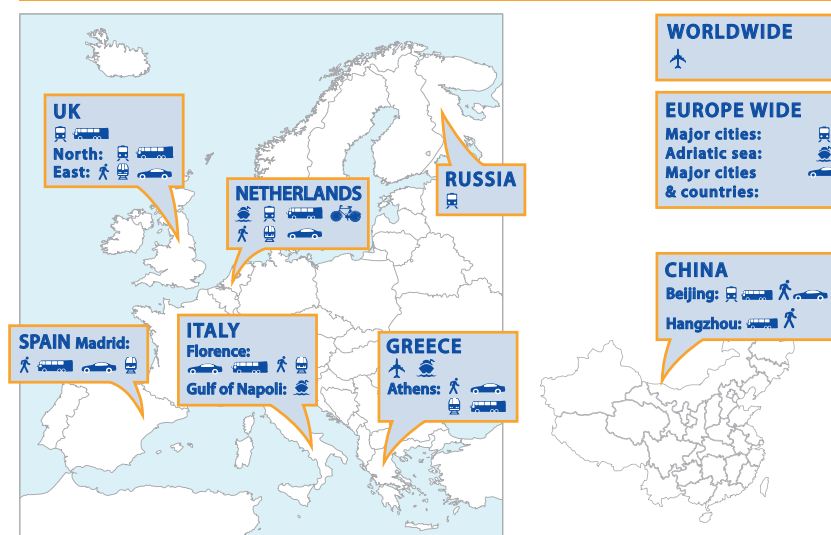

- Real-time event data and consideration of extraordinary conditions (strikes, disasters, extreme weather)
- Dynamic trip re-planning

Flexible Interface

- Mobile demonstrator
- Social Networking Functions for information dissemination and user experience exchange
- Integrated Ticket Approach

Extended Content Integration in terms of geographical coverage and transport modes (railway, car and bicycle)

COVERAGE & EXTENSIONS

Impact & Future Considerations

- Keep the international traveller informed across unexpected conditions and trip changes
- Linking Existing National Multi Modal Trip Information with International trip data to help promote use of public transport modes to and from major hubs
- Satisfying the requirements of populated user groups will empower user acceptance
- Integrated ticketing services will enable sustainability

Any Journey Planner and Real-time Data Provider can join and become visible through Enhanced WISETRIP
