

QuESSA Project photographs and illustrations illustrating the project activities.

Figure A1. Poll participants were shown pictures of crops and adjacent semi-natural habitats at various times of the season to be evaluated regarding their aesthetic attractiveness.

Figure A2. Example of a visual display of relationships between ESs discussed in the German focus group.

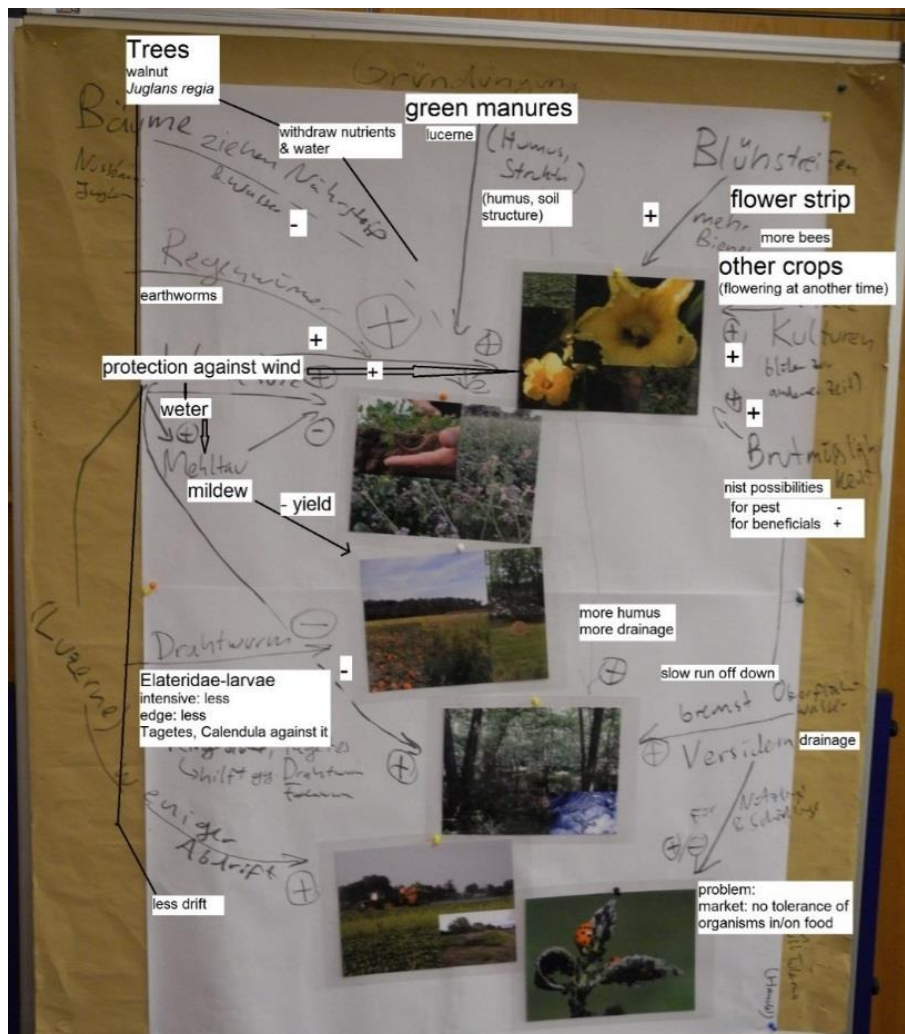

Figure A3. On-farm activities of the QuESSA project.

Farmers were asked to fill in pre-training test (post training tests will also be done)

Observing *Calliphora* larvae trial

Demonstrating the pollination trials in sunflower

Searching for beneficial arthropods (agro-ecosystem analyses) in winter wheat

Figure A4. The QuESSA logo.
